ADDITIONAL DETAILS

Gnotobiotic Core Facility (GCF) Experiments

Investigators must have a current MCW AUA that covers experimental animal use outlined in the proposed experiment. The PI's AUA protocol number and expiration date must be provided at the time of application.

The GCF AUA does not cover any experimental use of animals ~~at~~ the scope of GCF husbandry. Animals used in CMR PilotAward experiments will be held on the PI's AUA. Also, specific coverage for axenic mice must be amended into the PI's AUA; the CMR will provide detailed instructions and template language for submitting this amendment. Animals purchased from the GCF will be transferred to the PI's AUA.

Experiments using Human Study Subject Materials

Investigators must have a current MCW or CHW IRB that covers use of human study subject material outlined in the proposed experiment. The PI's IRB protocol number and expiration date must be provided at the time of application.

The GCF does not have independent IRB protocol oversight. PI's proposing use of CMR bench services for IRB-protected samples will need to amend ~~to~~ their IRB protocol to include the CMR and its personnel for appropriate access to work with the samples.
