

I want to start out by voicing my appreciation to all our education leaders and our education coordinators. Thanks for all your efforts toward recruiting our residents and fellows across all our training programs. An incredible amount of work goes into the recruitment process. Recruiting the best residents and fellows is incredibly important to our department, as it often is our residents and fellows that become our faculty. Congratulations on filling our programs with an outstanding 2024 class. I also want to voice my gratitude to Gary, Brenna, Jason, Scott, and team for all the work they have done in putting together and in building the medical school there and our work of building the residency. This beautifully furthered his vision. He was also proud to hear how WI CPCP has now delivered its 10,000th consult and metric primary care clinicians enrolled in every one of our 72 Wisconsin counties. Dr. Kerschner was especially pleased by the State Appropriation for GME has helped lift our department financially. He is also pleased about how the the Complexity Intervention Unit is working at Froedtert, and how we filled the new Med Psych Combined residency with excellent residents. I shared several other accomplishments with both MCW leaders. Some of the challenges I shared were space challenges, the CAIR/CHAIR moving process and safety concerns at Thrive On, the need for support for our psychotherapy training program as Ascension withdraws support, and the decreasing number of psychiatry sites across our community. Please know that most of all, I talked of the great staff and faculty we have in our department. It is a privilege to spend time with these great MCW leaders and receive mentorship from them. Early in my career, I was very anxious about these meetings. Now, I greatly enjoy sharing your incredible work with these great MCW leaders. Interesting how we grow and change. Thank you all for helping give me so much great work to share and giving me the opportunity to grow in your MCW Department of Psychiatry and Behavioral Medicine!

Armann, MD

Kubly Professor and Chairman Department of Psychiatry and Behavioral Medicine MCW
Chief of Staff for Mental Health, Milwaukee VAMC

Tosa Health Center

GETTING TO KNOW ...

Faculty and Staff from the Department of Psychiatry and Behavioral Medicine

Social Worker II
Tosa Health Center

Senior Administrative Assistant
Tosa Health Center

What is your educational background?

I received my Master's in Professional Counseling from Concordia University Wisconsin Mequon in 2017. I am credentialed as a Licensed Professional Counselor and a Substance Abuse Counselor.

How long have you worked at MCW?

I have worked at MCW since June of 2023.

Describe your typical workday.

I work with patients individually to

Education Program Coordinator II
Research Park Center

What is your educational background?

I have an MBA in Marketing and an undergraduate degree in Visual Arts, both from Concordia University Wisconsin. I have worked in higher education for 14 years.

How long have you worked at MCW?

I have worked for MCW for six years.

Describe your typical workday.

I support Medical Education team with my program director, Dr. Marika Wrzosek. We oversee the curriculum, clinical experiences, and everything in

psychiatry clerkship, electives, and acting internship.

What do you like most about your job what attracted you to this field?

I love working with my team in Psychiatry Education! It has been a great experience and very eye-opening on how healthy relationships at work can impact just how satisfying work can be.

Tell us about life outside of MCW.

I am a mother of an almost three-year-old, Eva, and the most of my time is spent on her. When I need a moment to myself, I go for a run. I am an avid reader, mostly consisti

How long have you been at MCW?

I have been with the Department of Psychiatry since February 10, 2003 21 years.

Could you describe your career highlights?

I would have to say being a part of the team that helps people to achieve their career goals, to become a psychiatrist. All the residents who I have worked with and have been able to help through the years has been an absolutely wonderful experience.

What is next for you?

Next will be quilting, gardening, reading a lot of me time. I am the official chauffeur for my one son and the

Blind Guys

my oldest

That will keep me busy!
